**Lightweight.
Streamlined.
Fuel Efficient.**

Founder Wally Byam knew that a rounded, low-profile shape would make towing easier and more stable. And he knew that aluminum would make his trailers as light as possible.

The successful combination of shape and lightweight design has made the Airstream travel trailer world-renowned for its superior structured integrity. That's because the Airstream employs semi-monocoque construction, using a riveted inner and outer layer of aluminum stretched over the frame. This way, the skin itself becomes a working part of the integral structure.

Hand-built with a craftsman's attention to detail, the Airstream offers unmatched durability and strength for its weight. Just ask one of the more than 100,000 Airstream owners!
